MAP HISTORY

The 1:100,000 Geological Series, a new initiative for mineral base for the country, is a series of preliminary maps covering the whole of Nigeria (12°N and 12°E). The preliminary data collection, preparation and analysis of topographical maps were undertaken by the Department of Economic Geology, UNIZI.

Detail mapping on 1:100,000 scale for this area, including interpretation, digitization and cartographic representation, were undertaken by the Map Production Unit of UNIZI.
